Dear Editor,

Thank you for your letter and opportunity to revise our manuscript “Charting pathways to climate change mitigation in a coupled socio-climate model”. The suggestions offered by yourself and the reviewers have been extremely helpful in constructing what we believe to be a substantial improvement to the original manuscript.

Following this letter is our response to the reviewer comments and description of the changes made to the manuscript. We have also included a ‘related manuscript’ file which indicates the changes in a blue font.

Thank you again for considering our manuscript for publication in PLOS Computational Biology. We look forward to hearing from your office.

Sincerely,

A handwritten signature in black ink, appearing to read 'Tom Bury', with a stylized flourish at the end.
